

Irfan Lodhi

Commercial Manager

Irfan is a Mechanical Engineer with over 9 years of experience in the construction industry and has led the development of major projects in Africa, from project development, right from design stage till commissioning stage.

As Commercial Manager, Irfan is responsible for the Planning and Controls, Contracts, Commercial, Tender Estimation and Procurement of the CSI Energy Group's Contracting business cluster across Africa. Well versed to construction procedures and methodologies, he has been working on projects of international standards with EPC Contractors and Main Contractors for a spectrum of industries, including malls, hospitals, power plants, airports and palaces.

Earlier in his career, Irfan served as MEP Planning Engineer at Drake and Scull Qatar, Senior Planning Engineer and Delay claim analyst at Urbacon Trading & Contracting, managing all subcontractor related to MEP, ELV, conveying system Planning for Design & Build VVIP Lusail Palace Project (contract value: 3.6 Billion Qatar riyal) and responsible for Delay claims for UCC Company. He worked on various international projects, including Mall of Qatar, Dar es Salaam Tanzania International Airport, Kilimanjaro Tanzania International Airport, Kinyerezi II 240 MW CCPP and Kinyerezi I Extension Power Plant.

A true supporter of talent development, Irfan has been leading and training fresh graduates involved in the different Group's projects. Holder of a Bachelor of Engineering from NED University of Engineering & Technology (Pakistan), Irfan believes human development and infrastructure can touch peoples' lives for the better.
